

## Too Hot - Too Cold?

Best Choice Roofing have been trading for almost 26 years and in that time, they have repaired many types of conservatory roof. However, most of them have all had one thing in common. Customers have all asked if there is a way to change the type of roof when all that was available was flat felt roof or concrete tiles. These are too heavy, so cause problems with the uPVC structure and leave you unable to open windows and doors because of the weight.

Now Supalite Roofs are available. They really do work all year round by keeping the room nice and cosy in the winter and stopping the excessive heat from the sun in the summer. Best Choice install over 150mm of insulation. It works by keeping the heat in and stopping the sun from getting in through the roof.

Best Choice Roofing are Supalite approved installers and even arrange the Building Control Regulations for you. So with one of their fully installed roofs, you get all the insulation and ventilation needed, with a good strong structure that will last for years. It has a 10 year guarantee from the manufacture and an 10 year insurance backed guarantee too, so peace of mind with quality from the market leader is obtained.
